

MERAN ALHUDAITHY

DATA SCIENCE AND AI ENGINEER

phone: 053 435 0603 email: meran.alhudaithy@gmail.com

Summary

Innovative Computer Information Systems student with a strong passion for AI and Data Science, eager to apply technical expertise and problem-solving skills to real-world challenges.

Skills

- **Programming:** Java, Python, JavaScript, Dart, NodeJS
- **AI:** ML, DL, CV, NLP, LLM, RAG
- **Data Science:** Data Cleaning, Feature Engineering, EDA, Visualization
- **Frontend:** React (with Next.JS), Streamlit, flutter
- **Backend:** FastAPI
- **Other:** SQL, git, Scraping, UI/UX, project management
- **Soft skills:** Problem-Solving, Fast Learner, Collaboration, Adaptability, Creativity,

CERTIFICATES

First Place – AI WAE Workshop

WAE Headquarters, 2024

Won first place in a company-hosted AI innovation competition

Chatbot with Rasa and Python

Coursera, 2023

Developed foundational skills in building chatbots using Python and Rasa frameworks.

Foundations of UX Design

Google, 2023

Learned UX principles, design thinking, and interactive prototyping.

Languages

Bilingual **Arabic & English**,
Beginner in **French**.

Education

■ Computer Information System

2022-2026

Imam Mohammad Ibn Saud Islamic University

- Bachelor's in computer information systems
- Over 150 verified volunteer hours inside the university through projects, strengthening both technical and soft skills documented on the Saudi National Volunteer Platform (NVP).

■ Data Science and AI

Tuwaiq Academy

2025

200 hours of intensive training covering Python, EDA, data cleaning, ML, NLP, and CV. Developed multiple practical projects with feature engineering, model training, tuning, and evaluation.

Experiences

■ Kacst- AI Engineer (Internship)

4-month internship in AI and satellite imagery analysis.

Projects

■ Bawsalat AI-Mumakkinat - بوصلة الممكنات

AI-powered platform that connects micro and small organizations with funding programs, incubators, and support initiatives. Built on an LLM-RAG engine with an AI chatbot and an edge device assistant (computer vision + STT/TTS). Delivered as a web application using React/Next.js, FastAPI, and JWT authentication

■ Noor – Graduation Project

Built a mobile app for children to learn Salah using Human Pose Estimation (HPE) for real-time posture evaluation. Integrated AI feedback, gamification (points, levels, quizzes), and a parental dashboard for monitoring and rewards.

■ Geospatial Satellite Crowd Analysis – KACST

- Built a computer vision pipeline to detect and estimate crowd sizes from high-resolution satellite imagery using image alignment and geospatial analysis.

■ Spoofing-Detection

Developed a GPS spoofing detection system for airplanes blackouts using satellite signal analysis

■ Developer – مقرراتي App

Developed a mobile app that helps university students manage and organize their courses.
